Who	Need	Purpose	
data analyst	I need to use a system that can generate reports on population data for countries and cities.	I have specific requirements for these reports, including countries and cities population from largest to smallest so that I can choose the number of top populated countries and cities to be included in the reports to save time searching each one separately.	
Student	Student I would like to view a list of all countries in a specific continent in a descending order of their population	so that I can finish my assignment.	
Writer/author	Useful information such as, name of country, country geolocation, population of country, country code.	writing a non-fictional book about a revolution of a given country.	

A reporter	for me to know location, population etc	doing a segment of a news channel about a earthquake stricken city.	
A geographer	I want to generate a report on all the cities in a continent, organised in ascending and descending order	order so that I can display this on a PowerPoint. This will be part of my content in an upcoming speech about the relation between urban cities and the number of people living in them.	
A tourist/traveller	I would like to know the most spoken language used in the world between Chinese, English, Hindi, Spanish, Arabic.	This is so I can know which language I need to learn to navigate myself through around the world.	
A teacher	I would like to be able to retrieve data of countries' population in a descending and ascending order.	The reason for this is to teach my class.	
A mayor	I would like to know the numbers of people who are	This is so that I can make informed decisions for	

	living in the city and those who are not living in the city in each region.	those people in that region which will be presented to live Television.	
A student	I would like to find out all the countries starting with a specific letter e.g. (F) in order of population in order.	This is so I can present my work in front of my whole class in school.
